MATERIAL HANDLING

6210 WALKIE STRADDLE TRUCK

VERSATILE. ADAPTIVE. PRACTICAL.

When you need to better utilise your vertical storage in tight areas and maneuver easier in congested quarters, turn to the 6210 Walkie Straddle Truck. Maximise your investment with a truck that can also load and unload trailers and position loads at an ergonomic height for stock replenishment or manufacturing tasks to meet a wide range of application needs. Our proven technology and reliable design features durable components with fewer maintenance points - resulting in less down time for service. The 6210 is an ideal solution for retail store back rooms, light-duty manufacturing and dock to stock applications.

+ AC traction control
provides seamless speed transitions giving you control to move the truck an inch at a time

+ Click2Creep
automatically reduces maximum travel speed and allows operation with the tiller tucked tightly to the tractor for tighter turning

+ accessory rich - highly productive
powered accessory bar with optional light for increased visibility; handy storage tote; magnetic shrink wrap pegs

+ ductile iron frame
supports the AC drive motor and has nearly twice the strength with greater resiliency than low-carbon steel

+ open view mast
helps maximise operator visibility for more precise handling

+ rubber bumper skirt
directs light debris away from bumper and drive tire

+ optional load wheels
available greaseable or non-greaseable; single or split wheel configurations

+ universal pack
features a high-frequency charger. operates either wet cell or sealed, maintenance-free. charging gauge lets operators know when pack is powered to go

+ variable speed lift/lower and cushion mast stops
provides smooth, precise, controlled load handling

+ electronic pin-code pad
secure access for operation helps prevent unauthorised usage and theft

+ IP65 protection to electronics
with sealed contactors, connectors, controllers and cabling your electronics can take a pressure washing and still reliably perform

+ electric brake release
controlled braking with the electric brake release engaged

+ snap fit polycarbonate covers
secure without screws making it quick and easy to service the truck

+ high strength low alloy
(HSLA) ribbed bumper tests at 3 times greater strength and durability over competitive bumpers, but weighs less and removes for easy access to service

GENERAL SPECIFICATIONS

907 to 1,134 kg maximum capacity

24 V. Battery Power Unit

Battery Compartments available in either
198 mm or 229 mm

Carriage, Class II, 859 mm Wide

Max. Elevated Height: 3,632 mm

127 x 254 mm Drive Tire, Poly, Crowned

1,067 mm Forks

1,016 mm Load Backrest

76 x 102 mm Poly Load Wheels

Fixed Straddle Baselegs (available in 25 mm
increments from 787 to 1,372 mm); Adjustable
baseleg optional to fit a wide range of
pallet sizes

Available in limited or full free lift 2
stage masts

OSHA and ANSI/ITSDF Compliance

TARGET USERS:

Retail Store Applications

Increasing storage capability in crowded back rooms.

Small Manufacturing Operations and Warehouses

Delivering product from workstation to workstation,
staging product in work in process racking, or a
waist-high pallet positioner.

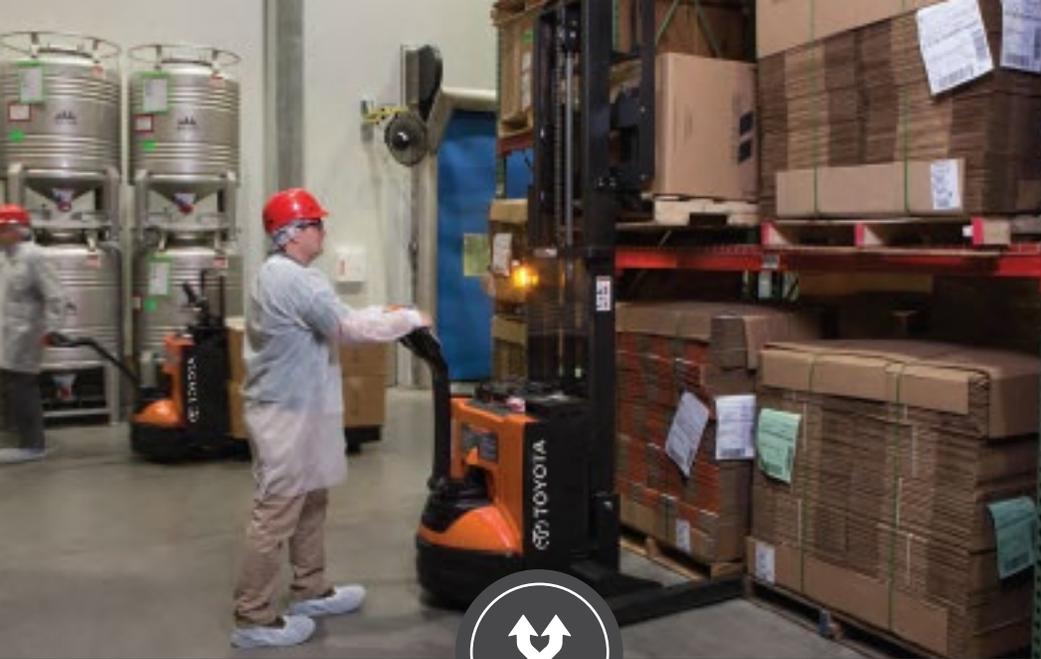

Dock to Stock

Loading and unloading pallets onto trailers and storing
product into racks.

TOYOTA

MANEUVERABILITY

SMOOTH, CONTROLLED OPERATION

CLICK2CREEP

The exclusive Click2Creep function enables the truck to maneuver with the handle in the upper brake position, resulting in a tighter turning radius with the handle tucked securely against the frame.

ELECTRIC BRAKE RELEASE

Releases the electric brake during low battery conditions. No need to remove the covers. Truck still retains braking ability when the handle is in the brake or up position.

ELECTRONIC PIN CODE PAD

Secure access for operation - helps prevent unauthorised usage while auto power off automatically powers the truck down when idle.

AC TRACTION CONTROL

Provides smoother speed transitions, giving you smooth, controlled operation at all speeds.

ERGONOMIC CONTROL HANDLE

Dual throttle controls are intuitive and easy to operate and learn.

ERGONOMICS

PERFECT FIT BETWEEN MAN AND MACHINE

PROGRAMMABLE PARAMETERS

Customise performance to fit the work environment.

WAIST HIGH FORK POSITIONER

Ergonomically position loads at waist height to reduce bending and lifting.

OPEN VIEW MAST

The open view mast design helps maximise operator visibility for more precise pallet handling and improved efficiency.

PRECISE SPEED CONTROL

Separation of speed and torque increases operator confidence and control.

VERSATILITY

KEY TO YOUR OPERATION

INCREASE YOUR CUBE UTILISATION

With aisle requirements as low as 1,981 mm and elevated heights up to 3,632 mm, store pallets up to 3-4 levels high.

DOCK TO STOCK SUPPORT

Use one truck to off-load pallets from the end or sides of trailers, deliver product to storage or retail shelves, put product away in racking and move or stage work-in-process on the manufacturing floor.

COLD STORAGE CONDITIONING

All temperature hydraulics, transmission oils and temperature sensing components protect control systems — assuring peak performance and productivity in temperatures as cold as -29 degrees.

UNIVERSAL BATTERY AND CHARGER PACK

Universal maintenance free pack with a high frequency charger delivers reliable power with no battery maintenance requirements.

DUCTILE IRON

Ductile iron frame supports the drive motor and has almost twice the yield strength of steel.

DURABILITY

STRONGER AND MORE RESILIENT

HIGH STRENGTH LOW ALLOY

HSLA ribbed bumpers (same material used in the automotive truck frames) test at 3 times greater strength over competitive bumpers but weigh less. Bumper removes for easy access for service.

IP65 PROTECTION TO ELECTRONICS

Sealed contactors provide electrical protection from dust, water and moisture.

POLYCARBONATE COVERS

Snap Fit polycarbonate covers secure without screws, making it quick and easy to service the truck.

FEWER MAINTENANCE POINTS

Hall effect sensors replace mechanical switches. Parts never touch — minimising wear — and extending component life.

CanBus technology reduces wiring up to 40%. Time delay lift cut out eliminates another switch.

+ warranty coverage

*Asset Protection™ is our industry-leading warranty that begins with a Standard Warranty – coverage that starts the moment the new truck arrives at your facility and continues for three years. * Additional coverage options are available; select the option that fits your fleet so you can maximize performance while locking in affordable, predictable service costs.*

**For complete details, refer to our Standard Warranty.*

+ expert technicians

For those customers who have lift truck technicians on-site, we offer Customer Technician Courses. Training is available at our headquarters, at your facility or your local authorized Sales and Service Center.

+ financing

For an outstanding and flexible equipment solution, your Sales and Service Center and Leasing Corporation deliver what your business needs – the equipment you need to grow, at fixed costs. We offer low ownership interest rates and variety of affordable and flexible lease options.

+ training

Studies have shown that effective operator training can help improve how your operation runs. Designed to help you protect your people, equipment and materials, Safety on the Move® can assist in satisfying the OSHA mandate to train your operators.

+ maintenance

Designed to fit your budget, we offer three plans specific to your needs which you can tailor for individual trucks or entire fleets: contract maintenance, comprehensive fixed-price maintenance and scheduled maintenance audit.

+ parts

Parts™ is the industry's most comprehensive one-stop shop for world-class lift truck parts. We are committed to meet all your parts and supply needs, regardless of the make or model of the truck. We sell only the highest quality parts that meet or exceed OEM quality standards.

+ pre-owned lift trucks

RENEWED™ offers certified, pre-owned electric lift trucks that have undergone a rigorous quality inspection and reconditioned with genuine OEM parts from top to bottom. Every truck is delivered with full warranty coverage.

+ rentals

A rental is the smart and economical solution to meet your interim material handling needs – whether you are looking for seasonal rentals, unplanned peaks in activity, replacing trucks for scheduled repairs or waiting for delivery of new equipment. Or, if you just want to establish the value of the equipment before purchasing or leasing.

FROM FLEET TO FINANCE, WE'VE GOT YOU COVERED

In warehouse management, the bottom line is the bottom line. And because efficiency works best when it works end to end, everything we offer is built to work together.

- + Trucks and Training
- + Fleet Maintenance and Parts
- + Warehouse Optimisation System
- + Certified, pre-owned lift trucks and Rentals
- + Industry Leading Warranties
- + Flexible Financing Solutions

From initial consultation to custom-designed solutions to long-term product and operational support – and with a network of more than 100 Sales and Service Centers – we provide unmatched, world-class support tailored to meet your needs, help you drive down costs and run your business better and smarter.
